LinkedIn: linkedin.com/in/sharif-shahriar-hossain | **GitHub:** github.com/shahriarhossain7860

CAREER OBJECTIVE

Flutter-focused mobile app developer experienced in building clean, responsive user interfaces and integrating REST APIs. Skilled in state management, authentication, and basic payment integration. Comfortable working independently or in teams, with a strong focus on meeting deadlines and delivering reliable, user-friendly applications.

WORK EXPERIENCE

Junior Software Engineer
Softvence Agency, Dhaka, Bangladesh
January 2025 – March 2026

- Designed and developed responsive Flutter UI components for multiple screen sizes
- Improved app performance by optimizing widgets and refactoring existing code
- Integrated multiple RESTful APIs to handle dynamic data
- Implemented social login and assisted with payment gateway integration
- Collaborated closely with designers and backend developers to enhance user experience

Software Engineer
Anirix Studio, South Korea, Remote
May 2026 – September 2026

- Developed and published YL Seoul, a production-ready mobile application for Android and iOS
- Designed and implemented responsive, user-friendly app interfaces with a focus on clean and consistent UI/UX.
- Integrated and consumed REST APIs, handling data fetching, API responses, authentication, and application-level data flow.
- Implemented scalable state management using Riverpod to manage application state and asynchronous data efficiently.
- Collaborated with the development team to implement features, resolve bugs, and improve overall application stability.
- Contributed to the complete app publishing process, including build preparation, store configuration, testing, and release deployment.
- Worked closely with backend/API requirements to ensure smooth integration between the mobile application and server-side services.

PROJECTS

Ylseoul

- Flutter Mobile Application. Developed a global lifestyle and entertainment app focused on K-POP events, ticketing, travel, and lifestyle services. Designed intuitive and responsive interfaces for event discovery, booking, and service management. Integrated REST APIs and implemented Riverpod for efficient state management and dynamic data handling. Contributed to testing, production builds, and the successful publishing of the application on the Google Play Store.

The Focus Club

- Flutter Mobile Application. Developed a calm and supportive productivity app focused on routines, focus, and consistency. Implemented tools for task breakdown, habit tracking, journaling, and progress monitoring. Designed features to support community interaction and shared experiences.
- App Store Link: https://apps.apple.com/us/app/focus-club/id6754791692

Prevailing Wage Timekeeper

- Flutter Mobile Application. Designed and developed the complete user interface with a clean, intuitive layout. Integrated backend APIs for time tracking, job and location management, expense logging, and reporting. Ensured smooth data flow, optimized performance, and UI consistency across the app. Contributed to building a reliable solution for accurate work-hour tracking and compliance.
